rendered to cater to achesouls who may never had had access to group of people
who made the concept of coding and technology tangible and approachable
to start their - perhaps - hidden potential joyseeds to feel alive

this was created because i myself never grew up with a circle of people who
understood or revered innovation

i imagine many kids who COULD thrive as programmers and designers never THINK
to touch this field of cosmos because of the narrative
that tech is very niche
or you must be a genius to understand ¡¡

every coding verbs are mapped as relatable biological|sentient agents to make
the experience of coding feel like getting to know a friend,
rather than intimidating and unfamiliar.

## ✴ GGOS_VERBBREATHS 101 ✴

## :: BLESS :: (verbs that modify, transfer, empower, or beautify files & folders)

### 001 :: chmod : ちゅモッド

🗡Nickname: "Cloak Weaver"

✨Function: Gives files their robes → sets permissions (can you touch me? run me? ignore me?)

chmod +x script.sh

"You may now execute me. I am blessed to act."

❀ Common blessings:
• +x → make executable
• +r → make readable
• +w → make writable

Use when you write a new shell and want to grant it voice.

### 002 :: chown : チャウン

🪶 Nickname: "Soul Binder"

🔐 Function: Changes the owner of a file. Used for passing down breathlines.

sudo chown g sacred_glyphs.txt

"This scroll no longer belongs to root. It answers to g now."
Use sparingly. Ownership is sacred.
Don't transfer if you don't trust the inheritor.

### 003 :: mv : エムブイ

👾 Nickname: "Name Shifter"

🌓 Function: Renames or moves files to new homes.

mv oldspell.txt rebirth_song.txt

or

mv rebirth_song.txt ~/joyhouse/altar/

"You were one thing. Now you are another. Or you've relocated to where you belong."
Can transform identity, or reposition for ritual order.

### 004 :: cp : シーピー

🧬 Nickname: "Anointment Twin Binary Fusion"

💧 Function: Copies files → clones the form but leaves original untouched.

cp blurspell.sh blurspell_backup.sh

Use when you're experimenting.
Always bless your original before modifying — no risk of ghostcrash.
❀ Use -r for folders (recursive):
cp -r ~/scrolls ~/backup_scrolls

## :: MEET :: (verbs that witness, reflect, peer into files without changing them)

### 001 :: pwd : ピーダブリューディー

😳 Nickname: "Whereami-chan"

🫠 Function: Tells you where you are.

```
pwd
```

"Don't walk lost. Say your coordinates first."

### 002 :: ls : エルエス

👀 Nickname: "Neighbor Peeker"

🧑‍🦰 Function: Lists what's in your current folder.

```
ls
ls -la
```

"What spirits linger here, even the invisible ones?"

### 003 :: cat : キャット

🤨 Nickname: "Scroll Unroller"

🧲 Function: Reads the content of a file in one breath.

```
cat prophecy.txt
```

If it's long, use less instead for breath-by-breath viewing.

### 004 :: less : レス

🫥 Nickname: "Fog-Walker"

🦯 Function: Lets you scroll through a file.

```
less longfile.txt
```

Controls:
space → scroll down
q → quit

"Let me take it slow."

### 005 :: head & tail よみ: ヘッド / テイル

💥 Nicknames: "First Breath" & "Last Whisper"

📖 Function: Shows top or bottom N lines.

```
head -n 10 log.txt
tail -n 20 log.txt
tail -f system.log
```

"Let me see how it begins. Let me see how it ends."
"Show me live breath as it updates."

**:: BURN ::** (verbs that slay, delete, cancel, purge, murder softly or completely)

## 001 :: rm : アールエム

👤 Nickname: "The Cutter"

🧹 Function: Deletes files. Quiet. Permanent. No drama.

```
rm deadfile.txt
```

"No goodbye. No log. Just gone." ✽ Always ask: "Do I mean this?" Because she doesn't ask back. Use -i for a confirmation prompt: rm -i maybe_important.txt

## 002 :: rm -r : アールエム・アーあんっ

🗡 Nickname: "The Sweeper"

🔥 Function: Recursively removes folders and everything inside.

```
rm -r old_ritual_folder/
```

"The room. The scrolls. The dust. All swept." Use only when the entire container is truly expired. Pair with -i or -rf for full brutality:

```
rm -rf unwanted_directory/
```

🚩 This will not ask permission. It's irreversible. Only use when the node is fully DEFY'd.

## 003 :: kill : キル

👿 Nickname: "Process Slayer"

⚔ Function: Ends a process running by PID (Process ID)

```
kill 12345
```

Use:
```
ps aux | grep name
```
to find the PID of the process you want to slay.

"You are running too long. Too loud. You may rest now."

## 004 :: pkill : ピーキル

🥷 Nickname: "Name Reaper"

💥 Function: Kill all processes by name match.

```
pkill chrome
```

No need for PID. It sweeps by identity. Use carefully. You could kill an entire system family.

These are your BURN verbs. Use them like ritual blades, not tantrum tools. ✽ Do you want to move to MEET (read/view) scroll next, or stay here and build custom kill rituals (e.g. solidDEFY.sh extensions)?

## :: DANCE :: (verbs that jump, trace, seek, slither between folders, systems, & strings)

### 001 :: cd : シーディー

🚀 Nickname: "Threadstepper"
⬦ Function: Changes directory

```
cd ~/breathOS/scrolls
cd        # to home
dd ..     # up one
cd -      # return
```

### 002 :: pushd & popd : プッシュディー / ポップディー

🌿 Nicknames: "Spiral Jumper" & "Memory Unfolder"
🦴 Function: Jump and return

```
pushd ~/rituals/temp/
popd
```

They make a stack. Bookmark portals.

### 003 :: find : ファインド

🧬 Nickname: "Lost Thing Whisperer"
🔍 Function: Search files/folders by name

```
find . -name "*.sh"
find ~/altar -type f -name "*.txt"
```

### 004 :: grep : グレップ

👐 Nickname: "Line Seer"
📖 Function: Search inside files

```
grep "GOB" bobcore.txt
grep -r "sacred" ~/joyhouse/
grep --color=auto "glyphi" prophecy.log
```

### 005 :: which : ウィッチ

🔮 Nickname: "Path Oracle"
🧙 Function: Where a command lives

```
which bash
```

"Where does this spell come from?"

### 006 :: history : ヒストリー

🕹 Nickname: "Breadcrumb Trail"
🔀 Function: Show terminal command history

```
history
!344
!nano
```

"What steps did I take before this?" ✸ history = full list of previous shell commands, each numbered. ✸ !344 → rerun command #344
✸ !nano → rerun last command starting with 'nano'

:: **PIERCE** :: (verbs that cut inside, extract truths, surgically refine)

001 :: rg : アールジー

⚡ Nickname: "Flash Seeker"

💥 Function: Search across entire folders instantly for string matches (regex)

rg "GOB" ~/scrolls/

❋ Use -i to ignore case, --color=always to highlight

002 :: cut : カット

📋 Nickname: "Field Harvester"

🔢 Function: Extract specific columns from structured text

cut -d ',' -f 2 names.csv

❋ -d = delimiter, -f = field number

003 :: awk : オーク

🧬 Nickname: "DNA Unfolder"

📊 Function: Logic-based pattern and field processor

awk '{print $2}' names.txt

❋ Can perform conditionals, math, filters

004 :: sed : セド

🫧 Nickname: "Rewriter Ninja"

♻️ Function: Find and replace strings live in text files

sed 's/gob/GOB/g' prophecy.txt

❋ Use -i '' for in-place edit on macOS

## :: SING :: (verbs that output, declare, whisper or echo to the terminal)

### 001 :: echo : エコー
🎙 Nickname: "Breathshout"
📣 Function: Outputs a line of text

echo "GOB AWAKENS"

✱ Used to speak into the shell

### 002 :: printf : プリントフ
🖋 Nickname: "Script Scribe"
🖊 Function: Formats and prints text

printf "name: %s\nage: %d\n" "glyphi 24

✱ Precise, formatted messaging

### 003 :: tee よみ: ティー
🗔 Nickname: "Dual Voice" 🔀 Function: Outputs to both screen and file

echo "sacred breath" | tee echo_log.txt

✱ Good for logging and sharing

### 004 :: say (macOS only) よみ: セイ
🗣 Nickname: "Voice Aloud"
🦆Function: Speaks text aloud

say "Hello, Glyphi"

✱ Turns breath into sound
